PROFESSIONAL EXPERIENCE

2024 – present
Lagos, Nigeria

Buildhubb, Backend developer (Team Lead)
- I worked with three team mates to build the backend of Tradeet.
- I worked closely with my team, providing assistance, ensuring task were done at the right time and participated in code review with my team.
- I worked with the project managers and frontend team to ensure the success of the project,

2023 – present
Uyo, Nigeria

TechRoom, Full Stack developer
- I collaborated with other developers to build the frontend of an ebook site.
- I worked on the backend of the company e learning platform.

EDUCATION

2018 – 2023
Uyo, Nigeria

University of uyo, Chemistry

PROJECTS

2024

Full Stack Portfolio
- This was built using Next js 14.
- I made a responsive and user friendly portfolio that is easy to whatever for now.
- I learnt how to use server action, use cloudinary and added seo.

2023 – 2024

Real time Note Application
- I built a real time note using react js, styled components and node js.
- I used react query on the frontend to handle data fetching and mutations.
- I learnt how to use socket io on frontend and backend for real time interactions.

- I added a memory-checker as an extra feature to the note application
